Stand-out features/functions

- Recommendations based on frequent tags associated with experiments the user has made bids for.

Specification List

Must Have:

- create experiments
- log in/out
- bid on experiment
- browse through experiments
- notification via email and interface if bid accepted
- view experiment details
- screen participants
- accept/decline bid

Could Have:

- view experimenter/fellow R@ts profile page n
- offer slots for experiments

Should Have:

- filter experiments
- students browse through past experiments
- students browse through experiments they bid on
- summary of past 5 experiments (all)
- summary of past 5 experiments with up and coming dates y
- summary of top 5 highest paying experiments y

Would Have:

- email list of up and coming experiments n
- recommendations based on tags

Achieved functionality

Must Have:

- create experiments
- log in/out
- bid on experiment
- browse through experiments
- notification via email and interface if bid accepted
- view experiment details
- screen participants
- accept/decline bid

Could Have:

- offer slots for experiments

Should Have:

- filter experiments
- students browse through past experiments
- students browse through experiments they bid on
- summary of past all experiments (and not 5)
- summary of past all experiments with up and coming dates (and not 5)
- summary of all highest paying experiments (and not 5)

Would Have:

- recommendations based on tags

Missing functionality:

Could Have:

- view experimenter/fellow R@ts profile page

Would Have:

- email list of up and coming experiments

User Personas

Christian Troy

Undergraduate Mechanical Engineering Student

Profile:

- 21 years old
- first year student
- has plenty of spare time on his hands
- interested in making some extra money in his spare time
- has bad eyesight

Critical Needs:

- browse through experiments
- find experiments that pay the most money
- get notified when he has to attend an experiment
- choose a time which does not conflict with his lectures

Opportunities to improve:

- notified via email when accepted to an experiment
- filter experiments which are appropriate for him
- notified the day before an experiment

User Personas

Danielle Perry

University teacher in the School of Psychology

Profile:

- 32 years old
- Honours and PhD in Psychology
- mother of 3
- researches psychophysiological insomnia
- lecturer and tutor for lvl 3 behavioural patterns course
- has a very busy schedule

Critical Needs:

- add her experiment to the site
- quickly approve or reject participants
- set timeslots which match her schedule

Opportunities to improve:

- notified when people have bid on her experiment
- notified the day before an experiment

User Needs Matrix

User groups and roles				Group1	Group2	Group3
I want to	Overall project	Internal	External	Student	Experimenter	Administrator
Create Experiment	1				1	
Filter Experiments	4			4	5	
Approve/Reject R@ts Anonymously	2				2	
Log In/Log Out	1			1	1	1
Browse Experiments	2			2	3	
Register	1			1	1	
View Experiment Details	3			2	3	5
Bid On Experiment	1			1		
Get Notified If Bid Accepted	4			4		
Choose a timeslot	5			5		
Create Timetable Slot	5				5
